

TZP - Newsletter

Winter 2007

This is the first of our newsletters – designed to fit into the new catalogue you have received this year. We will try to keep you updated about the activities in the company – both in Costa Rica and in Denmark – by sending you a newsletter 1-2 times a year.

In 2005-2006 we changed our company structure in many ways. First of all we no longer keep any tropical plants in stock in Denmark. All production and stock is now located in Costa Rica – and all sales and consultancy are done from our office in Denmark.

To be able to show customers the plants – we now offer a trip for 2 persons to our production facilities in Costa Rica – included the price of the total order. The visit includes inspection of the plants in the nursery before shipment to your exhibit. Exploration one-day trip in the primary rainforest and on your request a horseback-trip to beautiful waterfalls in the rainforest.

Remember – to contact us 6-12 months before you need the plants for your exhibit – and that minimum order is one 40 foot container, which covers aprox. 500 sqm exhibit with big trees, lianas, palms, understory and epiphytes.

Please contact us – for more information.

Marianne & Lars Bo
